Example: *There is a US shipyard in Washington, another in Los Angeles and a naval specialisation in Seattle. The US receives 2 CVs and 3 CAs on-map reinforcements this turn. 1 CA must set up in Washington, the next in los Angeles (Jay's choice which of his CAs go where) and the next naval unit placed on Seattle. The other 2 units could go on any port in the USA including those with units already placed.*
